Activity-4

- ① Oncology
- ② Colorectal Cancer
- ③ Stories
- ④ Practical Laboratory Experiments
- ⑤ Culture Adjustment
- ⑥ Relocation
- ⑦ Language Barrier
- ⑧ Homesickness
- ⑨ Award Winner
- ⑩ Motivation for Thriving
- ⑪ Grattitudes
- ⑫ Rapid evolution of technology Challenge
- ⑬ Work-life balance
- ⑭ Marie Curie as Role model in science
- ⑮ Radioactivity Research
- ⑯ "Persistence, Patience & Perseverance".
- ⑰ Open mindset
- ⑱ Being adaptable
- ⑲ Nobel Prize
- ⑳ Contribute to Science & World.
- ㉑ Successful Scientist

- ② Travelling, Swimming, crocheting, sewing
- ③ ~~Hobby~~ Hobby for detoxifying of body, mind.
- ④ DNA CRISPR-Cas9 gene editing technology, penicillin, vaccines
- ⑤ Never stop questioning

Main theme

- ① Story
- ② Culture
- ③ Motivation
- ④ Being Adaptable
- ⑤ Hobby
- ⑥

Main theme takeaways

An award winner's insightful interview. It explained a story behind her career like culture, language, relocation issues. It also shows how she overcame her issues through persistence, patience, perseverance and hobby to maintain work-life balance.

Her motivation is Marie-Curie's enthusiasm and hard work style. She is also explained how to keep pace of this technological ~~motivation~~ evolution. Being Open minded and thriving for new ideas can be helpful to become successful in every field. We should remind thyself that never stop questioning even its silly.

Finally she wants to contribute the field of science and improvements to the world. Also she wants to become a successful scientist in her field.
