

Activity-5

Md. Ahsan Kabir
ID : 0122520016

Persona 1 : The Proactive Toddler Parent

Photo :

Name : Md. Ahsan Kabir, "The Proactive Toddler Dad."

Quote : "My son is growing so fast, and every stage brings new questions. I need a straightforward way to get quick advice on his development & health, so I can ensure he's happy & thriving."

Characteristics :

- Age : 33 years old.
- Occupation : Principal Software Engineer, at a private company.
- Family Status : Parent to a 2.5 year old baby boy. He has navigated the infant stage & is now experiencing the joys & challenges of toddlerhood.
- Tech Savvy : High. Relies heavily on digital tools for work & personal life, expecting efficiency & convenience from application.
- Personality : Proactive, organized, ambitious, values evidence based advice, and seeks practical solutions. He's learned a lot in 2.5 years but recognizes new challenges.

arise with each developmental stage.

Experiences :

- Has experienced several common toddler illnesses e.g. cold, cough, diarrhoea etc & is familiar with when to worry and when to manage at home.
- Frequently has questions related to development milestones, behavioral challenges and nutrition for growing children.
- Finds making phone calls or online chat to the pediatrician and often prefers asynchronous communication methods.
- Values the ability to send photos or short videos of symptoms for initial assessment without needing an immediate in-person visit.
- Seeks to be well-informed about age-appropriate health topics & preventative care.

Motivations :

- To ensure his son's healthy development and well-being, both physically and emotionally.
- To efficiently access reliable, professional medical guidance for toddler-specific issues.
- To minimize disruption to his work schedule and family routine for non-urgent health inquiries.

→ To proactively address potential health or developmental concerns rather than reacting later

Goals :

- Life Goal : Raise a happy healthy & well-adjusted child who is confident in exploring the world.
- Experience Goal : Have a convenient, responsive & reliable digital channel for ongoing communication and advice from his pediatrician.
- End Goal :
 - ① Quickly receive expert answers to developmental or behavioral questions or initial assessments of minor physical symptoms without an in-person visit unless truly necessary.
 - ② Easily share photos, short videos with the pediatrician for visual context when describing symptoms or progress.
 - ③ Access trusted educational resources or receive proactive information from the pediatrician about upcoming developmental stages or common toddler issues.
 - ④ Efficiently manage prescriptions, rebills or routine inquiries through the system.

Personal: Dedicated, Busy Pediatrician.

Photo:

Name: Dr. Gueraishi, "The busy Pediatrician".

Quote: "I am committed to providing the best possible care for my patients, but the current communication methods often overwhelm my staff and me. I need a system that streamlines inquiries and helps parents get reliable answers efficiently."

Characteristics:

- Age: 40 years old.
- Occupation: Pediatrician with a busy private practice.
- Family Status: Married with two school-aged children so he understands the parent perspective.
- Tech Savvy: Moderate, Comfortable with Electronic Health Records (EHR) & digital tools, but values practicality & seamless integration over complex new technologies.
- Personality: Highly dedicated to patient well-being, values clear & accurate communication, practical, concerned about workflow efficiency and prone to professional burnout if not managed effectively.

Experiences :

- Receives a high volume of phone calls and portal messages daily from parents with varying levels of urgency, often disrupting clinic workflow and staff time.
- Spends significant time returning non-urgent calls or answering questions that could be addressed with standardized information.
- Concerns about parents misinterpreting online info or delaying necessary care due to uncertainty.
- Wishes for a better way to triage patient inquiries ensuring urgent cases are addressed promptly while routine questions are handled efficiently.
- Values continuity of care and maintaining strong trusting relationships with patient families.

Motivations :

- To deliver high-quality, accessible & timely healthcare to all his patients.
- To improve patient and parent satisfaction & adherence to care plans by making communication easier.
- To reduce the administrative burden on his staff & himself, improving clinic efficiency & reducing the risk of burnout.
- To ensure parents have access to credible, pediatrician-approved information, reducing reliance on unverified internet sources.

Goals :

- Life Goal: Be an excellent pediatrician who contributes positively to children's health, while also maintaining a healthy work-life balance for himself and his family.
- Experience Goal: Have a streamlined, organized & secure system for managing all patient communications.
- End Goal:
 - ① Efficiently triage urgent messages from non-urgent ones, allowing administrative staff to handle routine inquiries & freeing up his time for complex cases.
 - ② Provide parents with a reliable, controlled source of information for common conditions, reducing the volume of repetitive questions.
 - ③ Reduce the volume of non-urgent phone calls during peak clinic hours, leading to a more focused & less stressful work environment.
 - ④ Easily share patient-specific information or instructions securely with parents.
