Website: Prothomalo.com

Web Accessibility Principles followed list:

- ① Perceivable: Found caption for images.
- ② Operable: Easy to find news content. Also there is no time issue to read the content.
- ③ Understandable: The text and content are understandable & readable. Also its predictable to see news on which content after click.
- ④ Robust: It's compatible with mobile, tab, Web browsers.

Principles Not followed:

- ① Operable: Though its easy to find the right news, but too many advertisements are causing user disappointment.
- ② Robust: It's looking not fully compatible sometimes page contents are broken.

Suggestions for Improvement :

- ① First make sure the whole contents for the website is fully compatible without breasting issue.
- ② Avoid advertisement ~~to~~ or make less so that users are not disapointed.
- ③ Regularly audit the website after careful considerations for Web Accessibility principles.
- ④ Allow to intonce these & audit findings implementations properly.
- ⑤ Get feedback from the real users also.
